ITTIP at Longwood University Presents:

8th Annual STEM Learning Summit

Supporting Creativity and Innovation in the Classroom

When: September 22, 2015
8:30 am - 3:30 pm

Where: Longwood University
Farmville, VA

Cost: $25 per person

Registration Link: https://www.surveymonkey.com/r/2015ITTIPsummit

Educators and administrators interested in K-12 STEM should plan to attend!

Keynote: Innovation is a buzzword that gets thrown around a lot. But what does innovation mean for a school? Do teachers just throw students in a room and say “be innovative” and it happens magically? Don Wettrick is an Innovation Specialist at Noblesville High School, just outside Indianapolis, IN. He is the author of “Pure Genius: Building a Culture of Innovation and Taking 20% Time to the Next Level”. Wettrick has worked as a middle school and high school teacher; educational and innovation consultant; and educational speaker. Don is passionate about helping students find their educational opportunities and providing them with the digital tools they need to give them a competitive edge.

Other sessions throughout the day will focus on using problem-based learning in the classroom, STEM curriculum models, flipping the classroom, new technology tools, as well as an afternoon workshop by Don Wettrick for practical methods on bringing creativity and innovation into the classroom for administrators and educators.

Space is limited! Registration closes September 15, 2015.
